PROJECT SUN STREAK (U)

Session Procedures Report

FORMAT

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Control Number: OTHER E

Nickname:

Date of Session: 4 SEP 86

Target Country:

References:

Session Number: CRV-1

Date of Report: 4 SEP 86

Mission Status:

Technique Utilized: CRV

Source Identifier: RV-003

---

1. (S/NF/SK) TASKING: " Identify the type of materials stored in the buildings and connected area centered at coordinates ████████████████ known surroundings a. Shipyard, B- Railroad bridge c. Open sea. SG1B

2. (S/NF/SK) SESSION: Previously encrypted do (randomized) coordinates were used. After perceiving a gestalt of "structures", source was cued with (movement exercise) "Inside structures something should be visible. Very little session time was spent on outside area. Overwhelming perception (of all) of POMCUS ~~material storage site~~ (material storage) site continuing to drive source data.

3. (S/NF/SK) SUMMARY: Site is a group of structures, at least one of which is tall and airy. Inside structures are several areas; one area has long, lighted corridors with shiny linoleum floors, people in uniforms, pungent smells which reminded source of a hospital type setting. The other area seems to be a very large room with rows of large solid, dark-colored metallic objects which seem to be in "ready reserve" on storage, etc. This is a very strong impression of a POMCUS-type storage area for military

equipment in Europe.

There are other objects present at the site that are long, tapered, cylindrical, rounded and curved.

There is a feeling of massive, moving equipment and loud diesel engine sounds and smells.

4. (S/NF/SK) FEEDBACK: About ⅔ of the way through the

session, source asked monitor if the site was a 'utility assessment thing'. Monitor replied in the affirmative. Source then stated that "It feels like it."

At end of session, source asked monitor "How much do you know about site." Monitor replied that "he knew site had material stored there."
